EDUCATION

FPT University

Bachelor of Software Engineering

2022 - 2026

SKILLS

Languages: TypeScript, JavaScript

Frontend: React, TailwindCSS, HTML5, CSS3, Redux, MUI, Axios

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman

Other: Documentation, Responsive Design, Agile/Scrum

EXPERIENCE

FPT Software

09/2024 - 11/2024

Frontend Developer Intern

- Collaborated in a 5-member **Agile team**, participating in sprint planning, code reviews, and feature implementation for the product.
- Developed a **responsive online learning website** using **React**, Vite, and **TypeScript**, ensuring consistent user experience across desktop and mobile devices.
- Integrated video streaming with React Player and connected frontend components with **REST APIs** using **Axios**.
- Managed application state with **Redux Toolkit** and improved UI interactions using AOS animations and Swiper components.

PROJECTS

B-ShowSell - Social Media Content Management & Analytics System

08/2025 - 01/2026

Frontend Developer

- Developed a **React** and **TypeScript** workflow for managing Facebook and TikTok content, including daily post management and scheduling features.
- Integrated **Facebook and TikTok APIs** to track Views, Likes, and Shares, reducing manual data collection effort for content performance monitoring.
- Built an analytics dashboard using **Recharts** to visualize 10+ engagement KPIs for social media campaign evaluation.
- Applied **Atomic Design** principles to create 30+ reusable UI components, improving interface consistency across the platform.

Tech Stacks: React, TypeScript, Redux, Tailwind CSS, Recharts, Facebook API, TikTok API

Educare - School Medical Management System

05/2025 - 07/2025

Full-stack Developer

- Developed a school medical management system using **React**, **Node.js**, and **MongoDB** to digitize healthcare workflows for nurses, parents, and school administrators.
- Built **RESTful APIs** with role-based access control, data validation, and **CRUD operations** for student health records, medical incidents, medication requests, and vaccination workflows.
- Integrated **React** frontend with backend APIs using **Axios** to deliver role-specific interfaces and improve the efficiency of medical record management.

Tech Stacks: React.js, Redux, TypeScript, Node.js, MongoDB, Tailwind CSS, Material UI

LANGUAGES

- Vietnamese: Native
- English: Professional Working Proficiency (IELTS 6.5)
